

## PRODUCT LIABILITY AND WARRANTY

Fassmer is strictly following the IMO intensions with SOLAS III and MSC.1/Circ. 1206 with respect of annual and 5-yearly inspections and control of our Life Saving Appliances (LSA) delivered.

Fassmer has more than 50 service partners certified and authorized worldwide with over 230 service engineers to inspect and certify Fassmer equipment during annual and 5-year services on cruise ships, cargo vessels and offshore platforms.

All our service partners take part in our regular training programs to ensure quality and safety on board your vessels and are continually updated by Fassmer Service Bulletins.

The benefits of using Fassmer Service or one of our certified service partners are obvious

- **Increase quality and safety on board**
- **Maintain the warranty and product liability of your Fassmer LSA**

On the contrary, using a non-authorized provider for services of Fassmer equipment or failure of timely inspections result in immediate and irrevocable loss off product liability and warranty.

Our service partners and their personnel are well trained and certified for repairs, maintenance and inspections on Fassmer products. They can be identified easily by their Fassmer ID-cards.

An overview of our current service network is available on our website [www.fassmer-service.de](http://www.fassmer-service.de)
