Locations / Production plants

The headquarters of the Fassmer Group is the **Fassmer GmbH & Co. KG** site in Berne, Germany, on the River Weser. Located directly beside the river, the company site houses the administration offices, our development and design department and production workshops for all five product divisions – Shipbuilding, Lifeboats, Deck Equipment, Wind Power and Composite Technology. The main offices of our service subsidiary **Fassmer Service GmbH & Co. KG** are also on this site; **Fassmer Service America LLC** is located in Miami.

Another member of the group, **Fassmer Schiffsservice GmbH & Co. KG**, founded in 1986, operates from Rechlin, Germany. This company designs and builds components for our deck equipment division.

Markos sp.z.o.o. in Globino, Poland, is a joint venture with a Polish partner. In modern production halls, we manufacture fibre composite components for lifeboats, wind turbines, yachts and power boats.

Fassmer-Marland in Guangzhou, China, is a joint venture set up in 2005. The newly built and equipped office and production facilities are focused on the production of lifeboats, davits and boarding systems, primarily for the Asian market.

Shipbuilding

An expert in-house design and engineering team backed up by modern production facilities provides Fassmer with an exceptional capacity for innovation and ingenious technical solutions in shipbuilding. Fassmer can look back on a long tradition in the design and construction of one-off custom-built special purpose vessels. Fassmer also assists customers in building vessels locally anywhere in the world. To this end Fassmer offers material packages or prefabricated shipbuilding kits as well as basic and detailed design in combination with technical assistance and training.

Our products:

- Heavy-duty work ships
- Research ships
- Patrol boats and offshore patrol vessels
- Yachts
- Offshore, survey and supply vessels
- Ferries
- Naval vessels

Lifeboats

From the company's early beginnings in 1850, Fassmer has been contributing to safety at sea with innovative Lifeboats, Davits, Winches and Rescue boats. Through our in-house research and design department we are constantly working to further improve the safety and reliability of our marine life-saving solutions. We continue to set higher safety standards and have cooperated with IMO and governmental authorities to integrate such improved safety standards into new regulations.

Our products:

- Semi-enclosed lifeboats and tenders
- Enclosed lifeboats
- Freefall lifeboats
- Fast rescue boats
- Rescue boats
- Davits, winches and cranes

Deck Equipment

Fassmer offers a wide range of products to ensure that life on board is both functional and safe. Extensive experience with sea-resistant materials and a constant improvement and new development of specialised boarding systems, davits etc. make Fassmer an ideal partner for deck equipment to meet individual demands. Fassmer's service includes not only design and production but also installation on board, if desired.

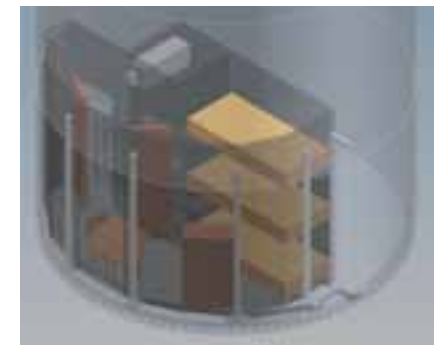

Our products:

- Davit systems
- Accommodation ladders
- Specialised boarding systems for yachts, cruise vessels and naval vessels
- Gangways
- Working rafts
- Shell doors and hatches

Wind Power

In the new and remarkably innovative market for wind power technology we need progressive and sustainable solutions. Fassmer is famous internationally for its wide range of components and systems solutions. The latest high-performance materials guarantee its high-quality product characteristics. In this sector the most important qualities are lightness, extreme rigidity and long life. Fassmer manufactures not only the glass-fibre and aluminium components for turbines and nacelles but also convinces with its offshore solutions including boat launching systems, helicopter winching areas and service boats for offshore wind parks.

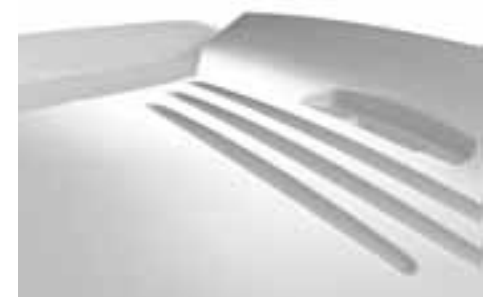

Our Products:

- Spinners and nacelles for wind power plants
- Offshore service solutions:
 - Helicopter landing platforms
 - Windlifts, survival cells
 - Service vessels

Composite Technology

Our competence in fibre composites is based on over 50 years' experience, highly trained and motivated employees, and expertise in a wide range of products and production processes. We see ourselves as partners for our customers through development, design, prototyping and serial production. Our production plants in Germany, Poland and China are equipped to deliver high flexibility, cost-effectiveness and quality.

Our products

- Structural elements for camper vehicles and caravans
- Fibre-reinforced components for the automotive industry
- Structural elements for construction machinery and rail vehicles
- Custom components

After-Sales Service

Our competence includes outstanding after-sales service. Customers of Fassmer Service GmbH and Fassmer Service America can rely on a round-the-clock response from almost 200 authorized service technicians in 40 countries worldwide. In this way we ensure the availability, safety and reliability of our products at all times. All service documentation is available online from our unique service database.

Our services:

- Services and repairs for lifeboats, launching systems, accommodation ladders and boarding systems (IMO/MS1206/MS1331)
- Service contracts
- Technical support
- OEM spare parts
- Worldwide commissioning and testing
- Training
- Backfitting of duplex release systems
